

Natural Strand
BAMBOO

Solid strand woven bamboo flooring

Exclusive to **Harvey Norman**[®]

Why Natural Strand Bamboo?

- COMFORT**
 Bamboo is cooler in hot temperatures, keeping your skin, feet and floor clean & comfortable rather than sticky. It is also warmer in colder temperatures.
- EASY TO CLEAN**
 Spills can be cleaned up with a mop or sponge. At all other time, electrostatic mops easily pick up dust and dirt.
- DURABILITY**
 Strand woven bamboo flooring is the hardest and rates more than 3000 on the Janka Scale, significantly harder than Brazilian Cherry (Jatoba) which is rated at 2350.
- ECOLOGY**
 Bamboo is a truly sustainable harvested grass that regenerates at least 8 times faster than hardwood. We use only fully matured moso bamboo selected for superior strength and maximum hardness.
- BEAUTY**
 Bamboo flooring combines quality with beauty and elegance. Steaming creates varying depths of colour whilst stains provide alternative options to the natural bamboo colour.

Specifications

- Specie: Moso bamboo
- Construction: Solid bamboo strand woven
- Profile: Click
- Finish: Aluminium Oxide
- Plank Dimensions: 1830mm x 125mm
- Plank Thickness: 12mm

Natural Strand BAMBOO

Solid strand woven bamboo flooring

Bamboo has become a popular choice for designers and architects alike, and now Australian families can enjoy the benefits of bamboo with Natural Strand Bamboo, a quality, yet affordable, fashionable floor exclusive to Harvey Norman.

Natural Strand Bamboo is a premium quality range of solid strand woven bamboo flooring, produced to meet the diverse climatic conditions of Australia. Developed and manufactured with the latest European technology and machinery, Natural Strand Bamboo is a high quality floor, which undergoes stringent testing and quality checks throughout the production process. This is backed up by a lifetime structural warranty and 25 year finish warranty to give you not only a durable and aesthetically pleasing floor, but also peace of mind, knowing it will outlast most other flooring alternatives. The strand woven process involves taking bamboo strips, compacting them together and creating a very dense and durable product.

The species of bamboo used in Natural Strand Bamboo solid strand woven bamboo flooring is Moso, one of the hardest species of the bamboo family. This adds to its appeal and quality. Moso is not eaten by pandas, who prefer other species of bamboo.

Natural Strand Bamboo Solid Strandwoven floors are produced with a 4-sided click system which is perfect for the DIY handy-person! It is a no-mess solution, requiring no glue, and as it is also prefinished with 12 coats of Aluminium Oxide coating, which means there is no messy sanding and polishing required either! So as soon as it is installed, you are free to carry on life as normal, but with a floor that will be the envy of family and friends for many years to come!

So whether it is an Eco-friendly floor, a trendy floor, or a durable and practical floor you are after, Natural Strand Bamboo ticks all the boxes to be your complete flooring solution!
